Experience

(references available on request)

Senior Software Developer — Shopify *September 2021 – Present*

- Owned architecture and technical direction for a client-side analytics library (JS SDK) used broadly across Shopify's ad-tech products, capturing 1B+ events/day
- Built instrumentation and downstream tooling on top of the resulting event stream, including backend work to support analysis and consumption of the data
- Led several tech-debt migrations on the library, including a web server component rewrite that introduced caching and delivered a significant performance improvement
- Implemented client side joining for marketing analytics view of attributed sessions
- Refactored Elasticsearch indexing for marketing automations

Web Developer Intern — Shopify *January 2021 – April 2021*

- Developed features for email marketing automations
- Researched and presented on use of cloud-based development tools

Web Developer — Digital Health Lab *March 2020 – December 2020*

- Led development of mobile health research project; Pathverse
- Implementing frontend web applications with React JS, Redux, Typescript
- Implementing RESTful API with Django and AWS

Frontend Developer — Referral Saasquatch *September 2019 – December 2019*

- Worked with React JS and Ember JS frameworks
- Generated UI mock-ups using Figma
- Developed system for frontend testing using Percy

Data Analytics Developer — Revela Systems *May – August 2019*

- Developed tools to generate executable data transforms
- Updated existing python module and implemented CLI for parsing CSVs

Data Management Assistant — Loving Spoonful *April – August 2018*

- Created [Volunteer Robot Web App](#) to manage shifts for volunteer programs
- Led data collection process using Google Forms and Sheets

Education

University of Victoria — Victoria, BC BSc, Computer Science / Sept 2017 – August 2021

Skills & Hobbies

- Write and maintain a [personal blog](#) (since 2015) and [monthly newsletter](#) (since 2022)
